INTERSTATE 75

GDOT
Georgia Department of Transportation

The app will have a GUI (Tkinter) with buttons for major ATL highways.

User will click on a highway to see the most recent GDOT updates for that highway.

Tweepy will access the Twitter API to pull the last 5 tweets from the highway's GDOT twitter page

The 5 tweets will be displayed on the screen immediately.

Much faster than searching and checking each page on the twitter app or twitter.com!
